RESPONSE TO RESTRICTION REQUIREMENT

Sir:

Applicant respectfully traverses the restriction requirement set forth in the Office
Action dated January 27, 2005.

In the Office Action, the Examiner sets forth a restriction requirement among three
groups of claims. Group I, claims 1-12, is drawn to a linear motor with a plurality of coils
in two perpendicular directions, and is classified in class 310, subclass 12. Group II,
claims 13-19, is drawn to an exposure apparatus, and is classified in class 355, subclass 72.
Group III, claim 20, is drawn to a method of manufacturing a wafer, and is classified in
class 430, subclass 311.

The Examiner asserts that the inventions of Groups I and II are related as combination and subcombination, and that the inventions of Groups I and III and Groups II and III are related as process and apparatus for its practice, respectively, and have acquired a separate status in the art as shown by their different classification such that the searches are not coextensive, requiring separate examination. These contentions are respectfully traversed.

Applicant notes that the inventions of Groups I , II and III are so closely related in the field of alignment and exposure using movable elements, stator coils and current controllers, that a proper search of any of the claims would, of necessity, require a search of the others. Thus, it is submitted that all of the claims can be searched simultaneously, and that a duplicative search, with possibly inconsistent results, may occur if the restriction requirement is maintained.

Applicant further submits that any nominal burden placed upon the Examiner to search an additional subclass or two, necessary to determine the art relevant to Applicant's overall invention, is significantly outweighed by the public interest in not having to obtain and study several separate patents in order to have available all of the issued patent claims covering Applicant's invention. The alternative is to proceed with the filing of multiple applications, each consisting of generally the same disclosure, and each being subjected to substantially the same search, perhaps by different Examiners on different occasions. This places an unnecessary burden on both the Patent and Trademark Office and on Applicant.

In the interest of economy, for the Office, for the public-at-large and for Applicant, reconsideration and withdrawal of the restriction requirement are respectfully requested.

Nevertheless, in order to comply with the requirements of 37 CFR 1.143, Applicant provisionally elects, with traverse, to prosecute the invention of Group I, namely claims 1-12.

Favorable consideration and an early passage to issue are also requested.

Applicant's undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should be directed to our address listed below.

Respectfully submitted,
